UiPath™

Supercharge Your Microsoft Application Automation in Cloud and On-premises

Dynamic, modern enterprises expect ready-made yet flexible automation solutions to achieve rapid results. They want pre-built integrations that solve business challenges for every environment. Robotic Process Automation (RPA), AI and cognitive technologies create a paradigm shift in how businesses manage processes and perform repetitive tasks to significantly accelerate productivity and efficiency.

UiPath, the leading RPA provider, partners with Microsoft to fuse RPA with a host of enterprise-ready cloud infrastructure, Artificial Intelligence (AI), productivity cloud, and cloud applications to help enterprises automate millions of tasks to become digital faster.

UiPath powers flexible automations that scale with Microsoft Cloud

Efficient automations with the Microsoft Cloud

Automate a broad range of repetitive tasks and processes within Microsoft Office, Microsoft Office 365, Microsoft Dynamics 365, and other applications.
- Use software robots to collaborate on spreadsheets, access stored files, and act on emails within the Microsoft Cloud both on-premises and online.
- Get pre-built activities ready to drag and drop into automation workflows.

Automated deployment on Microsoft Azure

UiPath offers the industry's first complete RPA automated deployment solution on Microsoft Azure.
- Quickly scale RPA initiatives in a fraction of the time.
- Ensure a completely predictable deployment to reduce risk.
- Easily scale and manage your digital workforce as needs change without manual intervention.

Automations for actionable insights

Infuse your business with AI technology and deliver advanced automations. The UiPath Enterprise RPA Platform integrates with Microsoft Cognitive Services to unlock key business intelligence from print and digital documents while accelerating data extraction and processing. Customers stay ahead of the competition with PowerBI template dashboards and customizable reports.

Security compliance

UiPath offers secure automation and simplified compliance with regulations. Microsoft Azure Active Directory support is built-in to provide best-in-class authentication and key protection. Defense-grade security and auditing include Role Based Access Control (RBAC), encryption everywhere, and Veracode certified code. Our technology is trusted by 60+ government agencies.
